

# AQUA A – Aquaculture Blend

Fish & Shrimp Farming

POWDERS

## OVERVIEW

---

REX-BAC-T® – AQUA A is ideal for use in fish and shrimp farms and has proven effective in numerous applications.

The ponds need to be cleaned prior to the new cycle. While disinfection of the pond bottom is performed in various cases, some farmers prefer to avoid this approach which is beneficial as the disinfectants will actually kill the good bacteria as well. However, disinfection of the water in the initial collection pond is a necessary step so that the disinfected water will then be passed on to the rest of the growing ponds.
